This essay is the logical and natural continuation of one very recent essay, and need to appoint on it right now at the very beginning of this story, just for a better understanding of the problems exposed. The title of that recent previous essay is ...¹

THE PRINCIPLES OF HIGHER STATES OF CONSCIOUSNESS

It was discussed that besides the three very well known states of consciousness we can find ourselves, like awaken state of consciousness, then sleeping, and dreaming, there are other four states of consciousness, almost forgotten, by the way, but strongly connected with drastic changes in physiology functioning and body and mind coordination. There is a transcendental state of consciousness as a fourth, which we are being involved in when practicing ... ***Transcendence Based Meditation***. This is a unique technique, very easy, effortless, a very natural after all, but it would connect us with the Being, with Pure Consciousness, Absolute, which are all expressions of the basis of all existence. In the scientific world the term ... ***Unified Field of all the Laws of Nature*** ... is being used for that very basis of life from where all the laws of nature, all forces, and particles, including the entire material world and our physiologies do emanate. The technique itself is very simple, practical, used twice a day, in the morning and the evening, while we are sitting comfortably in some room, and not being disturbed by anything or anyone else. The time needed is very short actually, and by using this particular technique which differs from contemplation and focusing process, and by using the process of transcending, we enjoy a very deep rest, and we are ready to release deeply rooted stresses which are deposited in our physiology due to exaggeration with work, fatigue, physical exhaustion, mental overdoing, and eventually depression.

Thus, Transcendence Based Meditation is primarily defined as a stress releasing technique. This is what all the world, but the western hyperactive world especially, needs more than anything else. We need a rest. Deep rest. Scientific researches have shown that the rest during the practice of Transcendence Based Meditation is much deeper than during the sleeping time. After all, that is the reason it is so effective in stress releasing. Just a regular practice two times a day, will easily bring us to the situation we have a lesser amount of stress in our physiology, we use more of our full potential, and we achieve much, much more during the daily activities completely irrelative to what we are doing and how we are doing. This is to say, we are involved in the fourth state of consciousness, the transcendental consciousness, only when we do use that technique, during the meditation. However, the regular daily practice of the Transcendence Based Meditation, along with the permanent exchange of deep rest and not too harsh activities, will bring us easily to the fifth state of consciousness, and this is ... ***Cosmic Consciousness*** ..., which we also call ... ***Enlightenment***, or in some literature, you will find the term ... ***Nirvana***. Then we are using the total potential of ours, and that is exposed in very quick thinking. The fact is, our brain can function faster than any computer in the world. Actually, it can function faster and better than all the computers in the world together. In such cases, we simply do not need artificial intelligence to help us. Besides, when entering that state of consciousness, we do not commit sins anymore, we do not violate natural laws, because we are established in all the laws of nature. As a consequence, we spontaneously do know what is right and what is wrong. We do not commit sins anymore.

There are many advantages of being established in the fifth state of consciousness, Cosmic Consciousness. Some I already exposed, but need to mention a few more definitely. Thus, in the bloodstream, there will be

¹ Please visit the following website ... <https://deconstructingtheillusion.com/vedic-science-and-vedic-literature/the-principles-of-higher-states-of-consciousness/>

a drastically increased flow of serotonin, the hormone of happiness. This is the background of the saying that Cosmic Consciousness is very blissful. Only bliss and joy do prevail in Cosmic Consciousness. Furthermore, as we are born to fulfill some wishes of ours, something that we had pre-planned even before the very birth, now, when being enlightened, we are ready to accomplish all our desires much faster. This is speeding up our evolution drastically. We have heard so many stories about enlightened yogis who are able to accomplish all they do desire instantly. Just an impulse of a desire, and it is being instantly fulfilled. Just like a finger flicking! Isn't that so attractive for all of us? Who wouldn't wish to function that way?

There are two more states of consciousness that I did not mention so far. The very next after the Cosmic Consciousness is God Consciousness. This is the sixth state of consciousness. This is where we truly do function as God. Even the polarity that we are involved all until that point, will disappear. Remember, when God created Man at his image, he gave him all the power he has. Besides, God gave a Man the free will to do with this power whatever he or she wants. This is the greatness of God who gave his children such splendid gifts. More about this state of consciousness is not necessary to be exposed in this moment. A very similar case is with the seventh state of consciousness, which is being called ... **Unity Consciousness**. We become one with Nature. We became one with the Creator. Just the same as with the previous state of consciousness, there is no need to go further on with explanations on this topic because it can become highly elusive, and to much abstract.

Now, where in this scheme we come in with the term God, religions, and our prayers directed toward God, or devoted to him?

Well, this is a very good question, indeed.

God is an emanation that belongs to the absolute non-doing transcendental Pure Consciousness, however, at the same time, it belongs to the relative field because he exposes some activities. He is doing something. In fact, he is doing a lot. Our devotion to God, no matter which religion is in question, we expose with our prayers. There we expose our gratitude to God, we glorify his achievements, but sometimes we ask for something, for some favors, for the grace of God, and similar. Nevertheless, prayer is just a special form of desire. Therefore the prayer is on the throne for every religious man. Prayer is very important, almost essential. However, because it is just a special form of desire, it is completely dependable on the strength and purity of our nervous system and physiology. If our physiology is full of stress, it will not be so effective in fulfilling our desires. That is the reason we can be less effective with everything that we are doing. Our creativity will suffer, and we shall not be successful within any field we are devoted to. Because of that, we can face a less evaluation on our jobs, and that can turn even to the bad luck with employments. And all that is coming out and being exposed just because of our atrophied gray cells in the brain. At a certain moment in history, due to some reasons, and along with some odd circumstances, humans lost the ability to use their full brain potential. Grey cells are atrophied because of not being used, and in such stages, in lower states of consciousness, we need a lot of time to accomplish something. To accomplish anything actually. The same is with prayers. If our brain cells and the complete nervous system are in a bad condition, full of dirt, sins, stresses, and similar, what on earth to expect with our prayers to God. Then, simply, our prayers are weak. The aimed target and this is always God, very likely can not hear it, and due to that, the fulfillment of our prayers could be delayed drastically. It can take months or even years to become fulfilled. Then, what we possibly can think? Well, we can think that God does not want to respond to our prayers. We possibly can start to blame God for non-responsive behavior. We can even lose our faith in God. What is even worse, we can become atheists. We can lose track of life, where we need to go, and what is the purpose of life. This is a hopeless situation indeed. In fact, this is the spiral toward accomplishing nothing and being nothing.

Now imagine that irrelative of religion we belong to, we start to practice Transcendence Based Meditation daily. We make it to be a daily routine actually. Life itself, the Evolution, is being expressed in two steps, Silence when everything is resting, and Activity, when we are being active. This is like day and night, or like

winter and summer. Activity and rest. Rest and activity. As deeper silence and inner stroke we produce, we shall be stronger in activity. The phase of activity is highly dependent on the inner silence we develop within ourselves. Thus, when we start to practice Transcendence Based Meditation, we just simply purify our nervous system, our complete physiology after all, and every day we become stronger and better in performance. Transcendence Based Meditation is because of activity, not because of isolation and breaking connections with daily routine. This is not for running away from our duties and obligations. On the contrary. Silence and Activity always go together hand in hand.

Therefore, Transcendence Based Meditation, even though it is defined basically as easy but very powerful stress releasing technique, it is much, much more than that. This is a means to connect with God. This is the link all religions are missing so much. Instead, they, those religions, did establish certain interpreters who will “tell you the word of God”. This is the complete mess, by the way, and the breakage with God. Their “telling the word of God” is just driving us away from God.

Transcendence Based Meditation, almost like storytelling, is that one simple but very natural technique, and when being introduced to the daily routine, it connects us directly with God, with the source of life, the Creator. God himself can possibly have different names when coming to incarnate on Earth, however, this is one unique, omnipresent, omnipotent, almighty God.² That is the reason, when we are connected to God this way, we also transcend all the differences between religions. All of a sudden, all the religions start to meltdown, and blend in. And when they do unify, this is Vedic Science, Veda, from where they, all these religions, did come from. The Cycles of Yugas force us that we sometimes go down in consciousness, but then we inevitably go up. Right now there is a need to step up, very quickly, and on a grandiose scale. That is the reason we need to unify our thoughts and efforts to rise in consciousness.

If we look historically, then we find out that almost all avatars, prophets, and great spiritual leaders came with the same message. The message is ...

***THE KINGDOM OF HEAVEN IS WITHIN YOU,
AND WHOSEVER SHALL KNOW HIS TRUE SELF, SHALL FIND IT.***

Krishna, historical Jesus, and many, many others, well, they all did carry the same message. They wanted to uplift the level of consciousness of the people. They all wanted to establish Eden, Heaven on Earth. For accomplishing this, we do not need to go anywhere. We just close our eyes and we do use Transcendence Based Meditation. However, we also do need to know something about Ether-Akasha. Remember that establishing Cosmic Consciousness is just a mechanical process of being saturated with Ether-Akasha, and therefore, we go there where we find more Ether-Akasha. We use Transcendence Based Meditation wherever we can, and that means everywhere. However, meditating in forest or mountain areas, close to waters or waterfalls, well, there we find out that our meditation is even more effective. In some cases, we use a special form of meditation, the so-called group meditation. It is proved that as more people do meditate together, the effects are even stronger. That fact can even have a significant effect on making the peace in the world. Transcendence Based Meditation is also a very important basic element for Yogic Flying. Yogic Flying is not an illusion or storytelling. We need to remember that the original formula for gravitation does contain Ether-Akasha. The original formulas of Maxwell also did contain about twenty elements that

² The term ... **incarnation** ... and ... **being incarnated** ..., just same as ... **reincarnation** ..., well all that is highly esoteric today, and not understandable to all. However, this is the key phenomenon for understanding the spiritual world, and life in its entirety. The point is that life is actually very spiritual, and if we remove this superficial layer of ignorance and the firm attachment to the material world, we will find out that life is highly esoteric as well. Once upon a time, the teaching about incarnation and reincarnation was a normal part of everyday life. Then somehow, in the Age of Ignorance, somebody put it out of order by decree. It was out of normal use, and put simply, the knowledge about was ... excommunicated. Reading and proper understanding of all my texts presumes that the reader is familiar with these terms and that the knowledge and full understanding is developed about the nature of a life where every individual is passing through innumerable incarnations just to be purified and perfected. This is not the basic intention of the Creator himself, by the way, but it happens that sometimes evolution of ours can go this way. This is the foundation of the saying which somebody launched very humoristically ... **Only fools are dying**. Thus, the fact is ... nobody is dying. However, this is all a very long story indeed. There are many adequate books, scriptures, courses, etc, and therefore, it is easy to find all the basic information and to tune along appropriately. A good beginning could possibly be with ... <https://en.wikipedia.org/wiki/Incarnation>

are simply erased, neglected, and finally forgotten. Thus, we find ourselves in the field of consciousness-based technology. We still need to purify that field a little bit. However, we are very close to establishing Eden, the Heaven on earth. We are very close indeed.

Today it is very easy to learn Transcendence Based Meditation. In almost every country, even every city, I would say, there are properly trained teachers who can introduce such meditation to you. For centuries and millenniums, it was passed from the teacher to the disciple along with oral tradition only. One was supposed to meet the teacher personally. However, today due to the Covid-19 crisis, some teachers and systems have even developed the method to do that online. One is free to choose and find a way of how to learn that precious meditation. There are no words enough to expose the highest importance of doing so because we are living in a very decisive time. Learning the Transcendence Based Meditation to purify our minds, nervous system, and the entire physiology can be proved as the key element in tuning with higher vibrations that will be deployed on Earth. Our planet Earth does pass through tremendous changes and we need to tune along with it accordingly.
